

# ***Pigweed Management in Wisconsin***

## ***“The Big, Bad, Cousin has Arrived!”***

UW-Madison Division of Extension and the UW NPM program are sponsoring an educational workshop focused on Palmer amaranth identification, prevention, and control in WI grain cropping systems. Dr. Rodrigo Werle, UW Cropping Systems Weed Scientist, Dan Smith, UW NPM Southwest Agronomist, and Josh Kamps, Regional Crops and Soils Educator will share strategies for controlling the spread of Palmer amaranth. Thank you to the Woodworth Family for the multiple year on-farm weed management collaboration!

### ***Workshop Highlights***

- ◆ Identification of Palmer amaranth
  - ◆ Characteristics of this plant
  - ◆ Risk of infestation in your fields
    - ◆ Systems on-farm control
    - ◆ Strategies to limit the spread

No cost to attend, please bring a lawn chair and wear appropriate attire to be outside! A \$5 box meal will be provided at the completion of the educational program to grab and go or stay and continue the conversations.

***Monday August, 14th—4:00 PM to 6:00 PM***

***Woodworth Organic Farms***

***15556 Cty. Rd. W***

***Shullsburg, WI 53586***
